

- Are you thinking about applying to a Clinical Program?
- Are you thinking about a career change into Healthcare?
- Do you need to complete some job shadow or observation hours?

These experiences are limited to observation only with no direct contact with patients, equipment or documents, and are restricted to specific patient care areas. Observation experiences are limited to 8 hours per calendar year. Individuals interested in an observation experience must contact CH Student & Resident Services (or designee). Requests will be approved on a case-by-case basis. Confluence Health reserves the right to restrict and/or deny any request at any time.

Confluence Health (CH) provides observation experiences for individuals who are either pursuing post-secondary education in a health-care field or current health-care professionals observing a CH provider, employee or in a CH facility.

Where can I get more information?
